

NEW TAX CREDIT INCOME GUIDELINES

EXPLANATION OF OUR PROGRAM

We are a **TAX CREDIT HOUSING PROGRAM**, which is regulated by the state. Our maximum allowable income depends on the number of people in the household. The maximums are set by the state and we must adhere to them. We also have a minimum required income, which is equal to 3 times the rent on the apartment that you choose.

For example, a household would have to make at least **\$46,044.00** per year for our 2-bedroom apartment, which rents for **\$1,279.00**; however, they could not exceed **\$58,560.00** gross per year including all sources of income with 3 occupants.

Our program is trying to target single income families or people on fixed income. But under this particular program we are required to follow state guidelines and regulations.
